

Miss.Africa Voices

Miss.Africa Voices is a regular online journal that presents women in tech experiences, opinions and observations. These stories come from DotConnectAfrica Internship Alumni and other Women who are leading the tech-preneurship fronts in their own ecosystems. The Miss.Africa Voices also serves to encourage more girls & women to get involved in STEM careers through our Miss.Africa Digital Program.

It is envisioned as one of the central pillars of DotConnectAfrica Trust's corporate social responsibility program, to attract a sizable women and girls demographic of Internet users in Africa in complementary gender development initiatives that improve the lives through digital inclusion.

Led by the DCA Academy, the Miss.Africa Digital also announced the annual Seed Fund program in Africa that provides grants to support women and girls in the Science, Technology, Engineering and Mathematics (STEM) fields to launch or expand their own initiatives that will increase their digital opportunities in IoTs, Mobile Internet, E-Commerce, Digital Marketing and leadership roles. The Seed Fund program is interested in learning about successful activities that are currently supporting women and girls in STEM, and through this effort, we identify how we might support scalability and their impacts.

To become a Miss.africa in your campus or city, please drop us an email to [eo\[at\]dot-connectafrica.org](mailto:eo[at]dot-connectafrica.org) and we will get in touch with you and help you take off in the domain name industry in Africa!

Miss.Africa Digital a.k.a FemPower

The Miss.Africa Digital Program is a gender-focused initiative targeted mainly at female youth audiences in Africa to increase their personal involvement in early technology use and adoption with a view to improving their digital self-awareness and empowerment, and bridging the economic divide through employment and/or entrepreneurship.

The Miss.Africa Digital Program is a **gender-focused** initiative

The FemPower Forum is a digital networking portal to allow our members and participants to network and have access to capacity building support, advisory and market linkages across Africa. It also launched an accompanying FEM-Power Newsletter to share and disseminate relevant information as well as highlight the powerful voices of these women and girls.

The Miss.Africa Digital provides Seed Funding Tech Initiative for women in Africa

Miss.Africa Initiative led by DCA Academy, is announcing a Seed Fund in Africa that will offer grants to support women and girls in the Science, Technology, Engineering and Mathematics (STEM) fields to launch or expand their own initiatives that will increase their digital opportunities in IT related training, jobs and leadership roles.

The program is interested in learning about successful activities that are currently supporting women and girls in STEM, and through this effort, we identify how we might support scalability and their impacts.

The Seed Grant for the amount Five Thousand US dollars (USD 5,000) will assist the winning initiative to start or expand their capacity.

A second category of One Thousand United States Dollars (USD 1000) will be granted as a prize for two other applicants from emerging African countries that create further socio-economic value for women by effectively leveraging tech opportunities.
